

# OEM certification has never been more important

As changes in vehicle technology and repair complexity continue to accelerate, collision shops need to ensure they have the right tools, equipment, training, facilities, and repair procedures to provide consumers with consistent, efficient, and quality repairs, returning their vehicles to OEM specifications.

The OEC Certified Repair Network (CRN) works with leading OEMs in North America to identify, certify, and promote thousands of best-in-class repair businesses. Certification benefits independent, dealer-owned and multi-location collision repair facilities by providing:

- Differentiation in your market
- Confidence in investments in tooling & training
- Marketing resources
- Improved productivity & efficiency
- Consistent, accurate, & quality repairs
- OEM and dealer customer referrals
- Certification Program-specific rewards programs
