

Customer loyalty is easy when your workshop can check a vehicle in under 10 minutes.

Not only does CheckLink increase workshop control quality, but it empowers employees to understand the importance of quality and attention to detail.

This promotes best practice, rectifies repetitive issues, and improves service bay utilisation and throughput.

CheckLink helps managing clients' expectations, reduces comebacks and improves the overall experience. You retain clients and increase loyalty, which leads to higher profitability.

CheckLink can be used by any mobile device configured.

4K+

dealers across 30 markets use CheckLink

500K+

repeat repairs avoided

2M+

vehicles already quality checked worldwide

Ready for a change in quality control? Discover CheckLink and its combined BookLink and Quotelink solutions.

Key features

Controllable workshop quality: identify process, training, vehicle, and technician competency issues.

10 minutes for a vehicle check: reports are delivered in real-time, so fresh data is available in analysis.

Customer loyalty: correct issues before the vehicle leaves the workshop, avoid repeat work and customer dissatisfaction.

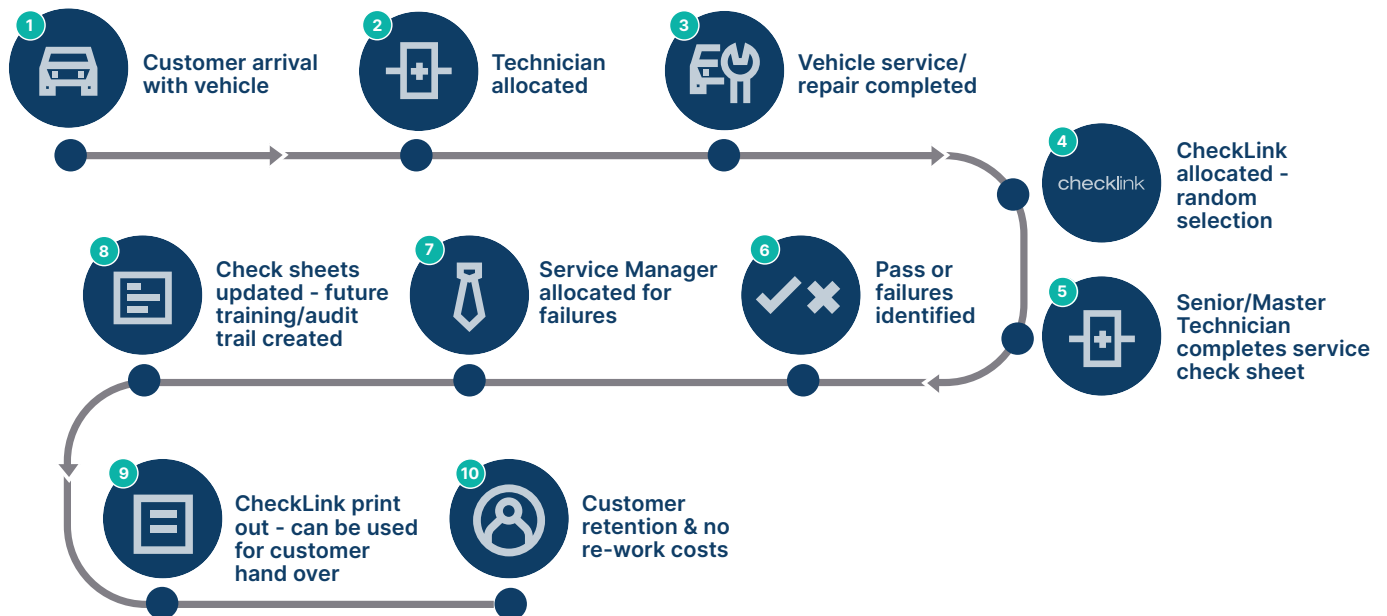

Relationships and profit: dedicate more time to customer service and making sales.

Streamline your workflow.
