

# Get More Done with Less Work

EPCLink is an add-on feature for RepairLink<sup>SM</sup> and CollisionLink<sup>®</sup> users, designed to provide direct access to parts catalog data directly within your OEC<sup>®</sup> Portal.

EPCLink saves you time, reduces switching between software applications, and makes your job easier than ever.

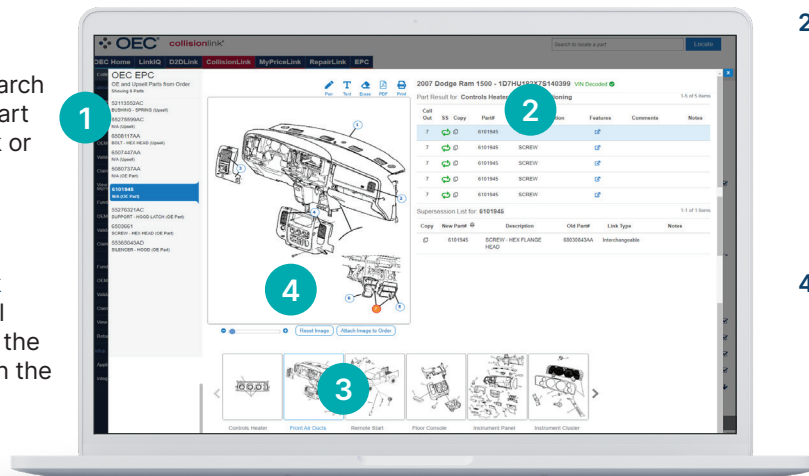

- Click on CollisionLink and RepairLink orders to view catalog part information
- See illustrations, supersession & part information for every part in your order
- Add related parts directly back into your CollisionLink or RepairLink orders
- Edit, add notes, and attach illustrations to the order for customers to view
- Stay in one application and reduce switching between OEC applications and your EPC

## 1. Search and Check Every Part

Use one-click to search the EPC for every part in your CollisionLink or RepairLink order.

## 3. Part Section Check

EPCLink displays all the sections where the part can be found in the catalog.

## 2. Accurate and Reliable Part Information

Up front information including super session data, pre-filtered illustration and section matrixes help find exact part information you need.

## 4. Illustration Editing and Sharing

Edit and make notes in part illustrations and share directly with customers through OEC Info Center.

Search less, save time, sell more.
