

Unlock the full potential of your dealer network inventory with PartsEye

As a distributor, how well do you understand the inventory status throughout your dealer network?

Gaining this visibility is crucial to optimizing operations, improving customer satisfaction, and driving profitability.

Do You Know:

- What is your dealer's off-the-shelf customer fill rate?
- How many days of supply does your dealer's inventory have?
- is the obsolescence value and percentage of total inventory?
- What is the stock value and percentage of total inventory?
- Are lost sales being accurately and consistently captured?
- How is each dealer managing their inventory stocking plan?
- What is the stocking status of recall and campaign parts?
- Do your dealers have an efficient process for handling customer special orders?
- Which dealers are effectively managing their inventory?
- What percentage of the dealer network's inventory is excess?

If you're uncertain about any of these, PartsEye can help! PartsEye is a powerful tool that provides actionable insights into dealer network inventory. We deliver detailed, monthly reports to dealers, regions, and networks, answering these vital questions and helping you make informed decisions that drive results.

Unlock the full potential of your dealer network inventory with PartsEye

Key features
