

Automate Your Dealers' Daily Order Work so They Can Get Back to Work

#1 Solution for Automobile Dealers

Founded and staffed by Parts Professionals in 2005, PartsEye is the #1 Remote Managed Inventory solution in America. Every day, PartsEye prepares daily stock orders for over 6,000 Dealerships in the USA, Canada & Mexico ordering \$6B in parts annually with 75 dedicated software and support professionals all based in America. Software & support are available in English, French & Spanish.

Automatically Have the Right Parts On-Hand

PartsEye creates daily optimized suggested stock orders based on your store's actual sales demand and inventory. Typically:

- Fast-moving parts are stocked more efficiently, reducing deployed capital
 - Locally stocked part numbers increase up to 50%, resulting in very high service fill rates
 - Special orders and related returns are reduced, as more parts filled from stock
 - Majority of parts inventory managed by PartsEye
- ... all for less than the value of "time saved" by your Parts Manager.

Make Your Parts Team Stronger

With the majority of inventory managed by PartsEye, Managers gain 3-4 hours per week to serve customers & develop business. Powerful, web-based portal makes it easy to locate parts, view demand history by part number and place orders for customers. OEM network D2D Parts Locator is included for every PartsEye dealer in your OEM network.

Enable Service CSI

Fill rates to your Service Department rise above 90%, enabling more vehicles to be repaired in one technician event. Labor & parts sales increase, as more scheduled, discretionary and upsell services are completed. Effective service capacity increases.

Return Fewer Parts

98% of PartsEye suggested orders are retailed within 9 months... Overall returns and related handling decrease and stay low... saving staff time & lowering return expenses.

Enhanced Reporting

Monthly reporting gives you insights into your business. KPI's and ratios, trend analysis and easy to understand graphic charts are prepared for your dealership each month.

Order Parts from any Connected Browser Screen

PartsEye is web based, intuitive and easy to use with no special equipment to buy... and it works with any DMS.

You Stay in Control with Included Support

Planners work with retailers and can adjust stocking parameters for unique situations. PartsEye Planners and Technical Support are available 8-8 daily and on demand after hours. Planners can train your personnel via phone in about an hour... on demand.
