

Turn a quote around in 10 seconds and reinforce your reputation for customer loyalty.

QuoteLink combines pricing data with labour pricing and any additional costs at the click of a button.

It has a simple, modern, and easy-to-use UI and can be web or DMS-based, or integrated into other solutions such as eVHC, BookLink, CheckLink, Workshop Control, and Manufacturer Vehicle Owner platforms.

QuoteLink uses manufacturer data curated by OEC's in-house authoring teams. It searches via VIN, VRN and Manual Match, giving users access to one simple and accurate menu, in line with manufacturer standards.

Create promotional offers at country, region & dealer levels to enhance customer retention through our Menu Manager module – a simple way to increase part and labour sales.
