

# Struggling with disconnected dealer systems? Let's make this the **easy part.**

With DMS Connect, you get all information you need from the solutions you already use, eliminating the need to train your employees on a new system. DMS Connect makes it simple for your OEC solutions to work together! It integrates CollisionLink, RepairLink, D2DLink, D2D Express, and MarketplaceDirect directly to your DMS. Processing orders directly through OEC gives employees time back in their day to get more done and helps ensure accuracy order after order.

With DMS Connect, your team can:

- 
**Use DMS sell price on OEC orders**
  - Save time by eliminating the need to verify customer selling prices in your DMS
  - Avoid pricing mistakes and improve customer satisfaction
- 
**Display your real-time inventory**
  - Stand out from competition by providing real-time information
  - Grow marketplace reputation with inventory dependability
- 
**Access your real-time inventory**

Make faster and more accurate selling decisions by knowing your current quantity on hand in OEC solutions
- 
**Create quotes in DMS from OEC orders**
  - Save significant time throughout the day by not re-entering orders in your DMS
  - Avoid mistakes and minimize costly returns, improving customer satisfaction and reliability
  - Send pick tickets to DMS from OEC orders (option based on DMS provider)
