

# PartsEye brings the power of information to service parts networks

We know the only parts that matter are those available to the customer.

## #1 solution for automobile dealers

Founded and staffed by Parts Professionals in 2005, PartsEye is the #1 Remote Managed Inventory solution in America. Every day, PartsEye prepares daily stock orders for over 4,000 dealerships across the globe, ordering \$6 Billion in parts annually with dedicated software and support professionals. PartsEye is available in multiple languages.

## Automatically have the right parts on-hand

PartsEye creates daily optimised suggested stock orders based on your store's actual sales demand and inventory. Typically:

- Fast-moving parts are stocked more efficiently, reducing deployed capital
- Locally stocked part numbers increase up to 50%, resulting in very high service fill rates
- Special orders and related returns are reduced, as more parts filled from stock
- Majority of parts inventory managed by PartsEye, all for less than the value of "time saved" by your Parts Manager

## Key features

- Optimised inventory efficiency
- Greater fill rates at the dealership level
- Improved technician productivity
- Better facility & capital utilisation
- Increased inventory turns
- Increased profitability
- Lower obsolescence & returns
- Higher customer satisfaction
- More time for business development
- Greater ROI – Return on Investment

# PartsEye brings the power of information to service parts networks

## Make your parts team stronger

With the majority of inventory managed by PartsEye, managers gain 3-4 hours per week to serve customers and develop business. Powerful, web-based portal makes it easy to locate parts, view demand history by part number and place orders for customers.

## Enable service CSI

Fill rates to your service department rise above 90%, enabling more vehicles to be repaired in one technician event. Labour and parts sales increase, as more scheduled, discretionary and upsell services are completed. Effective service capacity increases.

## Return fewer parts

98% of PartsEye suggested orders are retailed within 12 months. Overall returns and related handling decrease and stay low, saving staff time and lowering return expenses.

## Enhanced reporting

Monthly reporting gives you insights into your business. KPI's and ratios, trend analysis and easy to understand graphic charts are prepared for your dealership each month.

## Order parts from any connected browser screen

PartsEye is web based, intuitive and easy to use with no special equipment to buy, and it works with any DMS.

## You stay in control with included support

Planners work with retailers and can adjust stocking parameters for unique situations. Planners can train your personnel via phone in about an hour, on demand.
